Education

California State University Fullerton

Bachelor of Science, Computer Science – Concentration in Cybersecurity

Expected May 2027

3.5/4 GPA

Relevant Courses:

- Software Engineering – How to organize and follow through on software product development
- Cryptography – Secure and popular encryption algorithms, implementation, and possible flaws
- Data Structures – Classical, recursive, and object-oriented implementation of data structures
- Algorithms Engineering – Algorithm design using classical patterns and efficiency analysis

Sonoma State University

Bachelor of Science, Computer Science

August 2022 – May 2024

Projects

BrickGen

April 2026

Technologies: FastAPI, GeminiAPI, Imagen 3, Rebrickable API, React, Python

- Built a full-stack AI LEGO build generator using Gemini 2.5 Flash and Gemini Flash image preview, delivering piece-constrained custom builds from a single box photo – shipped in 24 hours at the LA Google DeepMind Hackathon
- Reduced image hallucination in step-by-step instructions by designing a sequential visual context system where each image generation references prior step images and build context

Refrigerator Tracker App

August 2025 - December 2025

Technologies: Swift, Xcode, GitHub, Gemini API

- Wrote an app in a group of 3 to track refrigerator contents, expiration dates, and generating recipes
- Integrated the app onto iOS as a software engineering class project
- Assisted in implementing Google Gemini to generate recipes based on fridge contents

Mini Drone

January 2025 – May 2025

Technologies: C++, ArduinoIDE, Readytosky Motors, AutoCAD

- Software Lead in a team of 5 to program control over motors
- Collaborated closely with Hardware Lead on researching technologies needed

Game Console with a Pokémon Style Game

August 2024 – December 2024

Technologies: C#, Unity, AutoCAD, GitHub

- Worked with a team of 15 to create a handheld console using a Raspberry Pi
- Developed party system, random encounters, and integration

Technical Skills

- **Languages:** C++, Python, HTML, CSS, Assembly, Swift, C#
- **Software:** Microsoft 365, UNIX, GitHub, Unity, Kryptos, Burp Suite, John the Ripper

Certifications and Organizations

- Theta Tau Co-ed Professional Engineering Fraternity, Phi Epsilon Chapter
 - Executive Board Scribe January 2026 – Present
 - Cooperated with a team of 4 to manage and run CSUF's Theta Tau Chapter
 - Community Service Chair December 2024 – May 2025
 - Organized community service events with local groups
- COMPTIA Security+ In Progress
- Member of the Alpha Lambda Delta Honor Society

Experience

Peer Advisor

January 2026 – Present

Project RAISE at California State University, Fullerton

Fullerton, California

- Guided transfer students through navigating through a new school and setting goals
- Created and presented lectures to support professional development
