Education

California State University Fullerton

Bachelor of Science, Computer Science – Concentration in Cybersecurity

Expected May 2027

3.5/4 GPA

Relevant Courses:

- Software Engineering – How to organize and follow through on software product development
- Data Structures – Classical, recursive, and object-oriented implementation of data structures
- Algorithms Engineering – Algorithm design using classical patterns and efficiency analysis

Technical Skills

- **Languages:** C++, Python, HTML, CSS, Assembly, Swift, C#
- **Software:** UNIX, GitHub, Unity, Kryptos, Burp Suite, John the Ripper, Microsoft 365

Certifications

- COMPTIA Security+ Present – December 2026

Projects

BrickGen

April 2026

Technologies: FastAPI, GeminiAPI, Imagen 3, Rebrickable API, React, Python

- Built a full-stack AI LEGO build generator using Gemini 2.5 Flash and Gemini Flash image preview, delivering piece-constrained custom builds from a single box photo – shipped in 24 hours at the LA Google DeepMind Hackathon
- Reduced image hallucination in step-by-step instructions by designing a sequential visual context system where each image generation references prior step images and build context

Refrigerator Tracker iOS App

August 2025 – December 2025

Technologies: Swift, Xcode, GitHub, Google Gemini API

- Developed a native iOS app in Swift with a team of 3 for a software engineering course, allowing users to track refrigerator contents and monitor expiration dates
- Integrated the Google Gemini API to generate recipes from current fridge inventory, with results organized by difficulty level and preparation time
- Built a grocery list feature to help users plan purchases and reduce food waste

Game Console with a Pokémon Style Game

August 2024 – December 2024

Technologies: C#, Unity, Raspberry Pi, GitHub

- Worked with a 15-member engineering fraternity team to design and build a handheld console powered by a Raspberry Pi
- Lead and developed the creation of a party system allowing for up to 6 Pokémon with persistent stats across battles

Organizations/Leadership

- Theta Tau Co-ed Professional Engineering Fraternity, Phi Epsilon Chapter
 - Executive Board Scribe January 2026 – Present
 - Serve on a 4-member executive board responsible for the operations and governance of the CSUF chapter of Theta Tau, with 50+ active members
 - Serve as the chapter's liaison to the national organization, keeping the chapter management system accurate and up to date with membership and officer records
 - Community Service Chair December 2024 – May 2025
 - Planned and coordinated 4 community service events in partnership with local organizations, engaging 15 members and serving 20 people/hours
 - Built and maintained relationships with California State University Arboretum and the Fullerton Museum to secure ongoing service opportunities

Experience

Peer Advisor

January 2026 – Present

Project RAISE at California State University, Fullerton

Fullerton, California

- Mentor 29 transfer students through their transition to CSUF, meeting with each multiple times per semester to set academic and career goals and track progress
- Design and lead professional development workshops on topics including LinkedIn optimization and technical interview preparation
- Provide one-on-one guidance on navigating campus resources, course planning, and the transfer process
